OUR STORY

Thasaamah Technology Incepted in 2012, as a Information & Communication Technology (ICT) and Security systems provider, to cater innovative solutions and services to companies locally & Internationally. Thasaamah developed extensive experiences in many fields such as Digital Workspace, System License & Subscription, Cyber Securities & Software, Network & Data Centre, Switchgear, IT Trading, and EXTRA LOW VOLTAGE -“ELV” & Complete Lighting Solutions Service

AVCOM Technologies, a pro AV division of Thasaamah Technologies for Audio Visual (AV), Home & Office Automation and IoT based smart technology solutions, was also incepted in 2014.

Since the inception we successfully completed many projects in all the verticals such as corporates ,hospitality , governments, health-care and schools.

Our services are designed to provide ICT,AV,ELV and Security Solutions with our large pool of professionals and their expertise to help your business to achieve efficiency ,reliability and security.

As a part of our global expansion ,Today we have our operations in Qatar, UAE , UK and INDIA .

OUR VISION

Our vision for information technology is to create an environment where all clients have easy access to the information technology resources and information they need, and to provide an information technology infrastructure that supports their needs.

We are committed the technology to support our mission and to creating an information technology “baseline” that embraces the diversity and innovation that will allow Thasaamah Technology to become preeminent among Clients.

Since we recognize that this baseline will be a moving target, we are committed to reviewing our IT plans on a regular basis to ensure that we are not falling behind

OUR MISSION

We are committed the technology to support our mission and to creating an information technology “baseline” that embraces the diversity.

We believe that this is a very important statement to us. We want our customers to feel that they are the most important part in our business. Whether buying, selling or servicing, we want our customers to know that we are constantly looking for the best solution for them. When we meet our client, we are always prepared to allay all the trepidation and queries that they have. We always make sure that we render our best service every time we deal with our client.

OUR COMMITMENT

We strive to deliver a level of service that exceeds the expectations of our customers. If you have any questions about our products or services, please do not hesitate to contact us. We have friendly, knowledgeable representatives to assist you.

- Service Provider Networking
- Internet of Things (IoT)
- Unified Communications
- Video Conferencing
- Secure Collaboration
- Contact Center
- Hosted Collaboration
- Call Recording / Call Billing / Fax over IP
- XML Applications.
- Cloud Solutions
- Virutalization

Our offerings also include:

- ISP (In-Side Plant) Passive Infrastructure
- OSP (Out-Side Plant) Passive Infrastructure
- Data Center Physical Infrastructure Solution

MANAGED SERVICES & OUTSOURCING

We will be able to optimize the best balance of facilities, processes, resources, tools and metrics, resulting in the best overall value for the client.

DATA CENTER & CLOUD SERVICES

Our expertise spans from providing specialized Infrastructure Components such as Servers, Storage, Virtualization et cetera to complex solution addressing customers Private and/or Public Cloud setups. We even have the expertise to work on complementing solutions for both new and existing networks.

Infrastructures ranging from Disaster Recovery, Replication, Data Availability, Backup and help businesses with Security, Big Data and Analytics requirements with use-cases ranging from physical security to log management. Modernizing data centers with next generation Software Defined Everything approach is also one of our specialty where we build solutions based on software components that include for example Software Defined Storage and Networking.

DIGITAL TRANSFORMATION

Create new customer experiences, transform business models, and empower workforce innovation. To do this, companies need a foundation that is outcome driven and enabled by technology.

We work with our vendors to provide the foundation for digital transformation that consists of a comprehensive product and services portfolio, digital solutions, and a developer environment supported by a broad global ecosystem of partners.

CYBER SECURITY

We offers two kinds of Cybersecurity disciplines

A - Operation Technology Cybersecurity

This is to protect industrial environments operations from Cybersecurity threats as they become more technology aware. We are in collaboration with world leading technology vendors who offers end-to-end cybersecurity solutions for industrial operation such as DCS, ICS, SCADA, BMS, Smart Cities, Utilities, Transport, Banking, Education and Health-care.

B- Information Technology Cybersecurity

This is to protect computer networks and systems from Cyber threats. we offers a complete suite of solutions for virtually any kind of business environment. Managed and/or Local Security Operation Center – SOC are offered by Thasaamah Technology, while partnering with the leading players in this space.

ELV & IT INFRASTRUCTURE

Our ELV and IT infrastructure division provides innovative next generation technology solutions for IT and ELV Infrastructure based on industry best practices to address needs of Small, Medium, Enterprise, Government, Defense and Service-Provider customers.

Cisco Certified Engineers, Netapp Certified Engineers, VMware Certified Engineers, Certified Design Experts, BICSI RCDD / DCDC Professionals, CTS certified AV Consultants, Certified Security System Engineers, Certified Power and Cooling Engineers and a capable PMO team of qualified Project Management Professionals (PMPs) – all of whom are based locally in Doha/Qatar – provide prompt services to our customers at their beck and call.

Additionally, we are having a 24×7 Help Desk Service to cater to customer calls and address IT issues around the clock. We also provide state-of-the-art training facilities at our dedicated in-house Demo & Solution Center.

Business Application Development

Web development project planning

Drawing on the experience in over 30 industries, our business analysts define project requirements and outline the scope of a future web app. After that, our PMs provide a high-level project plan, give rough time- and budget estimates, and compile a team for your web project implementation.

Tip: If you already have key project documentation but aren't sure about your next project steps, consult our guide on the web app developer hiring process, where we compare in-house hiring with team augmentation and dedicated team cooperation models.

- Autodesk
- Microsoft
- Adobe
- Blue beam/Sketchup pro/Lumion etc.

WEB APP DEVELOPMENT

Thasaamah Technologies' web architects are experienced in designing all latest architecture patterns, including microservices, headless and PWA, while our developers are skilled in taming a wide variety of web development tools. To ensure on-time and quality delivery, we leverage our Project Management Office competencies and use a rich set of KPIs, such as:

- Lead Time/Cycle Time.
- Release Burndown.
- Code Churn.
- Mean Time to Recover (MTTR).
- Escaped Defects, etc

Types of Web Solutions We Develop

- Project & task management systems
- DMS and ERP
- CRM
- Financial management systems
- Document management systems

UX and UI design

Catering to the specific needs of your target audience, Thasaamah Technologies' UX and UI experts create intuitive navigation and appealing interfaces for your web software. Our responsive web app design guarantees smooth digital experience across all devices, thus leading to higher user satisfaction and increased conversion rate.

Tip: Make sure to share your brand book with us – and our UI designers will turn your web solution into an asset for boosting brand awareness.
